

The City of Las Vegas Safekey program accepts employer issued child care assistance vouchers, Clark county child Care Assistance (formerly EOB) and Community Development Block Grant (CDBG) Scholarships.

Employer Reimbursement Vouchers: vouchers are usually issued by the employer as a reimbursement. Your payments to Safekey or City of Las Vegas programs must be current for all program fees for an employer reimbursement voucher to be completed. It is the parent or guardian's responsibility to ensure that staff has all pertinent paperwork to complete the reimbursement request. Staff is not responsible for keeping employer reimbursement paperwork on file at the site.

State of Nevada Childcare Development Program: Parents must apply for assistance at the CCCA offices located at 2500 West Washington Avenue. Vouchers are site specific and cannot be used for any location other than what is stated on the voucher. It is the parent/guardian responsibility to adhere to all expiration dates and rules of CCCA and ensure that all of their information is current. Parents will be responsible for all fees to the program if their vouchers are not renewed by the expiration date or if they change schools. Call 387-0985 for more information on the application process.

Community Development Block Grant Scholarships (CDBG): CDBG program assistance is available for participants who wish to register in City of Las Vegas Safekey and recreation programs. The application process is easy. Assistance is limited, offered on a first come, first served basis and is site/program specific. Applicants must reside within the City of Las Vegas boundaries to qualify for financial assistance. Applicants who reside in Clark County, North Las Vegas, Henderson or un-incorporated Las Vegas are not eligible for assistance. Application instructions are available on site or at the East and West Safekey District offices. Call 229-2883 if you require additional information. Beginning July 1, 2008, CDBG program assistance is awarded for weekly registrations only for Safekey.
